

METHOD AND SYSTEM FOR EFFICIENTLY CONSTRUCTING AND
CONSISTENTLY PUBLISHING WEB DOCUMENTS

ABSTRACT OF THE DISCLOSURE

5 A method, which may be implemented by employing a
program storage device, for determining an order in which to
construct objects, in accordance with the present invention,
includes the steps of providing a plurality of objects, at
least one of the objects including a relationship with
another object in the plurality of objects, identifying at
least one relationship between the plurality of objects,
representing the at least one relationship between the
plurality of objects using at least one graph, and
traversing at least one graph to determine the order in
which to construct objects in accordance with the at least
one relationship and an update to at least one of the
objects in the plurality of objects.
